

VELOX oneX

*Everything you expect from a detector:
Superior performance in high mineralization.
Depth. Speed. Easy use. Lightness and Ergonomics.*

Velox Has It All!

www.noktaengineering.com

VELOX oneX

Ideal for coins, jewelry, relics, and small metals that are difficult to detect; Velox has been developed for tough ground conditions. Velox offers an exceptional detector to users by combining its depth advantage, speed and ease of use with its newly designed search coil and special settings that enable convenient use in high mineralization.

You will enjoy detecting targets at depths that other detectors cannot reach as well as easily searching in high mineralized ground (extremely salty soil, wet beach sand, wet plowed land or highly magnetic ground conditions) which are problematic for most detectors.

FIND MORE COINS, JEWELRY, RELICS & GOLD!

IRON SWITCH AND IRON DISCRIMINATION

Iron switch enables you to eliminate ferrous metals so that when you do not want to detect these type of metals you can search by turning the iron switch off. It also provides ease of use in heavy trash areas.

On the other hand, especially in areas of high iron mineralization and beach sand, iron discrimination enables the ground effect to be reflected as iron and to be eliminated by turning the iron switch off. In addition, it enables metals containing iron to produce a low tone and to be discriminated more easily.

METAL DISCRIMINATION

Velox has very stable and easy to understand metal discrimination. It produces a high warning tone for non-ferrous and a low one for ferrous metals.

SIGNAL AUDIO BOOST

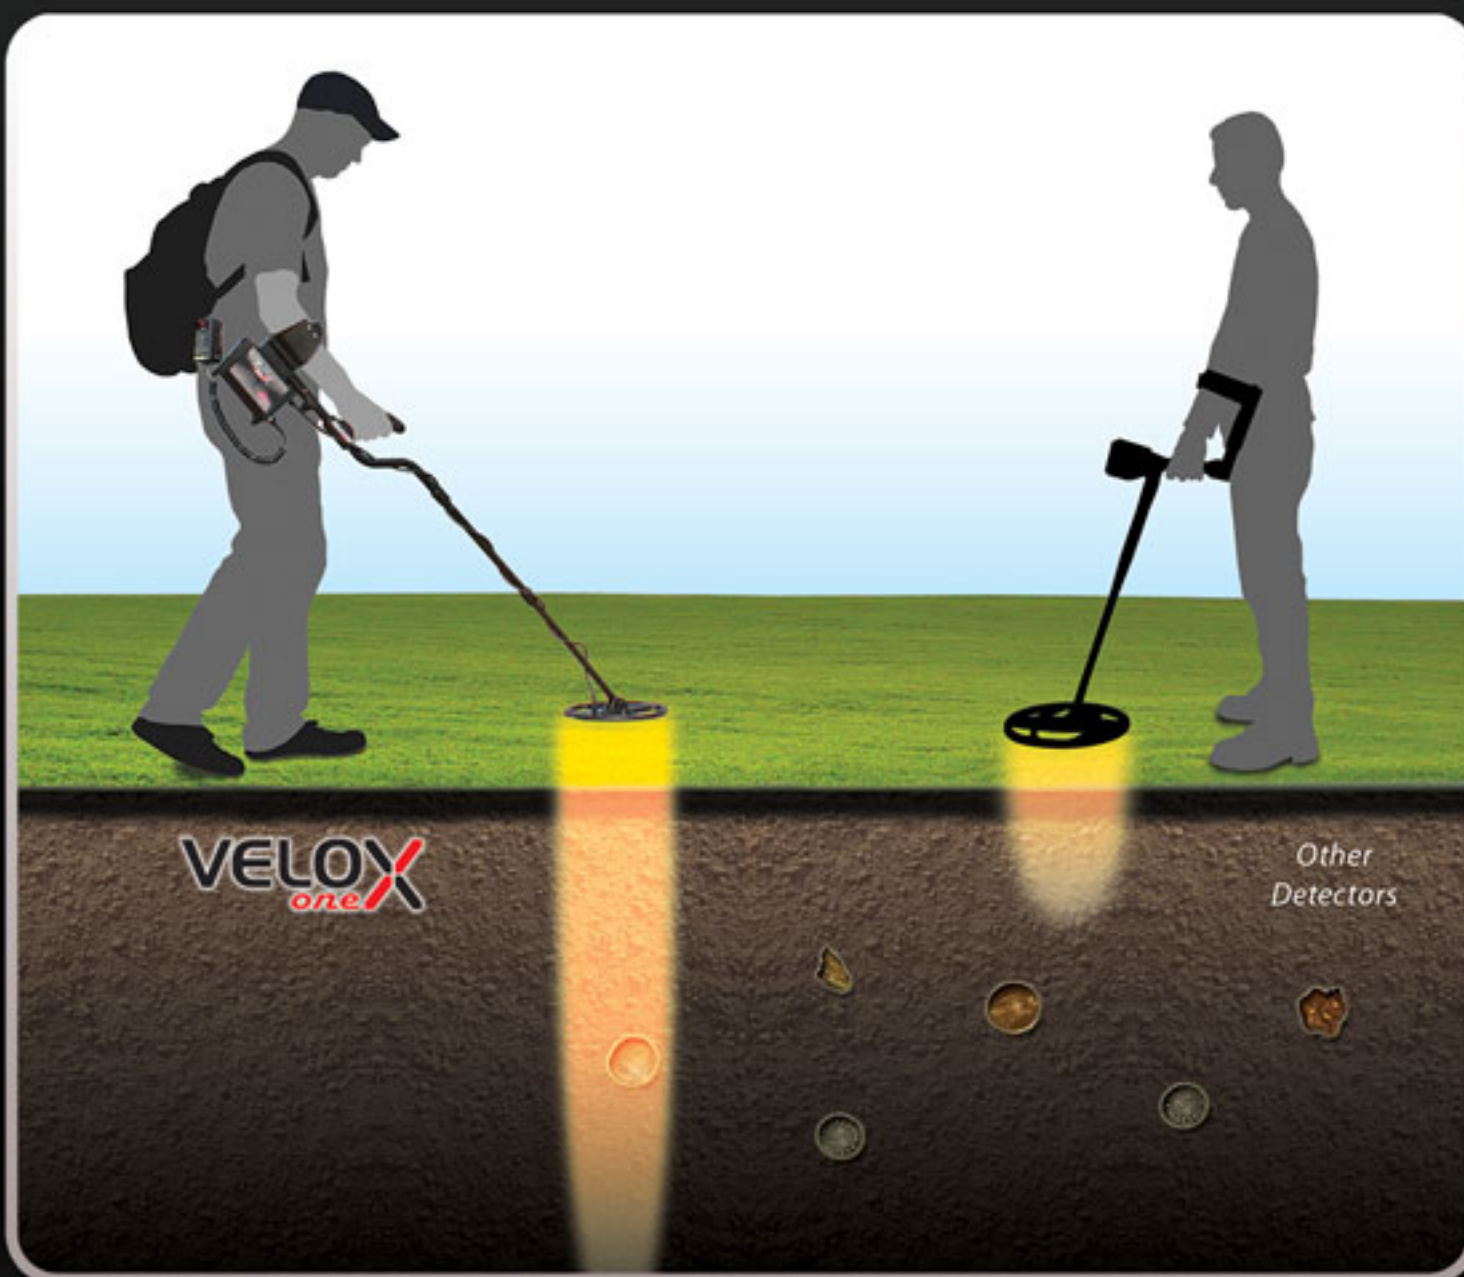

Boosts the sound of weak signals received from small or deep metals making it easier for you to detect those uncertain targets.

An exceptional detector that can find metals even in high mineralized ground with its newly designed search coil and special settings!

- ✓ Deep Ground Penetration
- ✓ Fast Recovery Speed
- ✓ 3 Tone Audio Discrimination
- ✓ Silent Search (No Threshold)
- ✓ Easy and Comfortable Use
- ✓ Superior Performance in High Mineralization
- ✓ Ferrous Elimination
- ✓ Long Battery Life
- ✓ Light and Ergonomic Design

DEPTH ADVANTAGE

NEWLY DESIGNED, WATERPROOF SEARCH COIL

OPTIONAL SEARCH COILS

23cm (9'') Small Search Coil

The lightness advantage of the 23cm (9'') coil allows you to search for a longer period of time without getting tired. It also provides convenient use in heavy trash areas.

39x45cm (15.3'x 17.7'') Large Search Coil

Developed specifically for users seeking more depth, this search coil provides a significant amount of depth advantage when compared to the standard search coil. In addition, it offers greater coverage enabling you to find targets faster.

LONG BATTERY LIFE

You can search for 25-30 hours with the battery specifically designed for Velox. It offers you the opportunity for an uninterrupted search as well as the great advantage for outdoor use where the means of charging the battery is limited.

You can check the battery level by pressing the battery check button and recharge the battery anytime you like.

TECHNICAL SPECIFICATIONS

Operating Principle:	Induction Balance
Operating Frequency:	17.5 KHz
Metal Identification:	Audio warning
Audio Discrimination:	3 tones
Sensitivity Setting:	Manual
Ground Balance:	Manual
Search Coil:	28cm (11") waterproof Double-D
Battery:	Rechargeable Lithium Polymer
Headphone Output:	1/4" mono
Length:	125-145cm (49" - 57") extendable
Weight:	2.0kg (4.4 lbs.) including the search coil
Warranty:	2 years

Included Accessories

Search Coil (28cm (11"))

Search Coil Cover

Headphones

Rechargeable Battery

110/220V AC Charger

**GREAT
ADVANTAGE!**

Optional Accessory Kit

Including:

Small Search Coil

Large Search Coil

Spare Battery

Battery Case

Car Charger

Carrying Bag

Optional Accessories

Carrying Bag

Battery Case

You may use the battery by attaching it to your waistband or to the side of the system box using the optional battery case.

Car Charger
