

FORS

Gold

THE ULTIMATE FORCE IN GOLD PROSPECTING!

■ **FORS Gold,** with its features, design and accessories, is a professional metal detector developed based on gold prospectors' needs worldwide.

FORS Gold has been designed extremely sensitive to the smallest nuggets. It has advanced settings which minimize the effects of highly mineralized soils and hot rocks frequently encountered in gold fields. It will find nuggets that other detectors miss at unmatched depths.

The Pro package, not only offers a perfect detector but also all the search coils and accessories you will need for gold prospecting. **FORS Gold** is not only the ultimate force in gold prospecting but it is the ultimate gold detector you will ever want to purchase.

Features

- For the Toughest Terrains
- Dual LCD Display
- Graphical User Interface
- Digital Target ID
- ID Masking
- Ground Tracking
- Auto & Manual Ground Balance
- 3 Search Modes (General. Discrimination. Boost)
- 5 Different Audio Frequencies
- Electronic Pinpointing
- Depth Indicator
- Frequency Shift
- Vibration Mode
- Built-in LED Flashlight
- Waterproof Search Coil
- Easy Use & Ergonomic Design
- Long Battery Life
- 10 Languages

With its extreme sensitivity,
it will find nuggets that other detectors miss at
unmatched depths.

For the Toughest Terrains

- As all experienced gold prospectors know, gold fields in the world have tough ground conditions for detectors. These fields, most of the time, contain high amounts of iron minerals and hot rocks which cause false signals and negatively affect the performance of metal detectors. **FORS Gold**, thanks to its advanced settings designed to eliminate these minerals, works flawlessly even on the toughest terrains.

3 Search Modes

General Search

Sometimes referred to as the "All Metal" mode, this is the deepest mode of the device. Different than the other modes, this mode has a constant threshold sound in the background. You can search deeper by listening to the variations in this sound.

Discrimination (DI3)

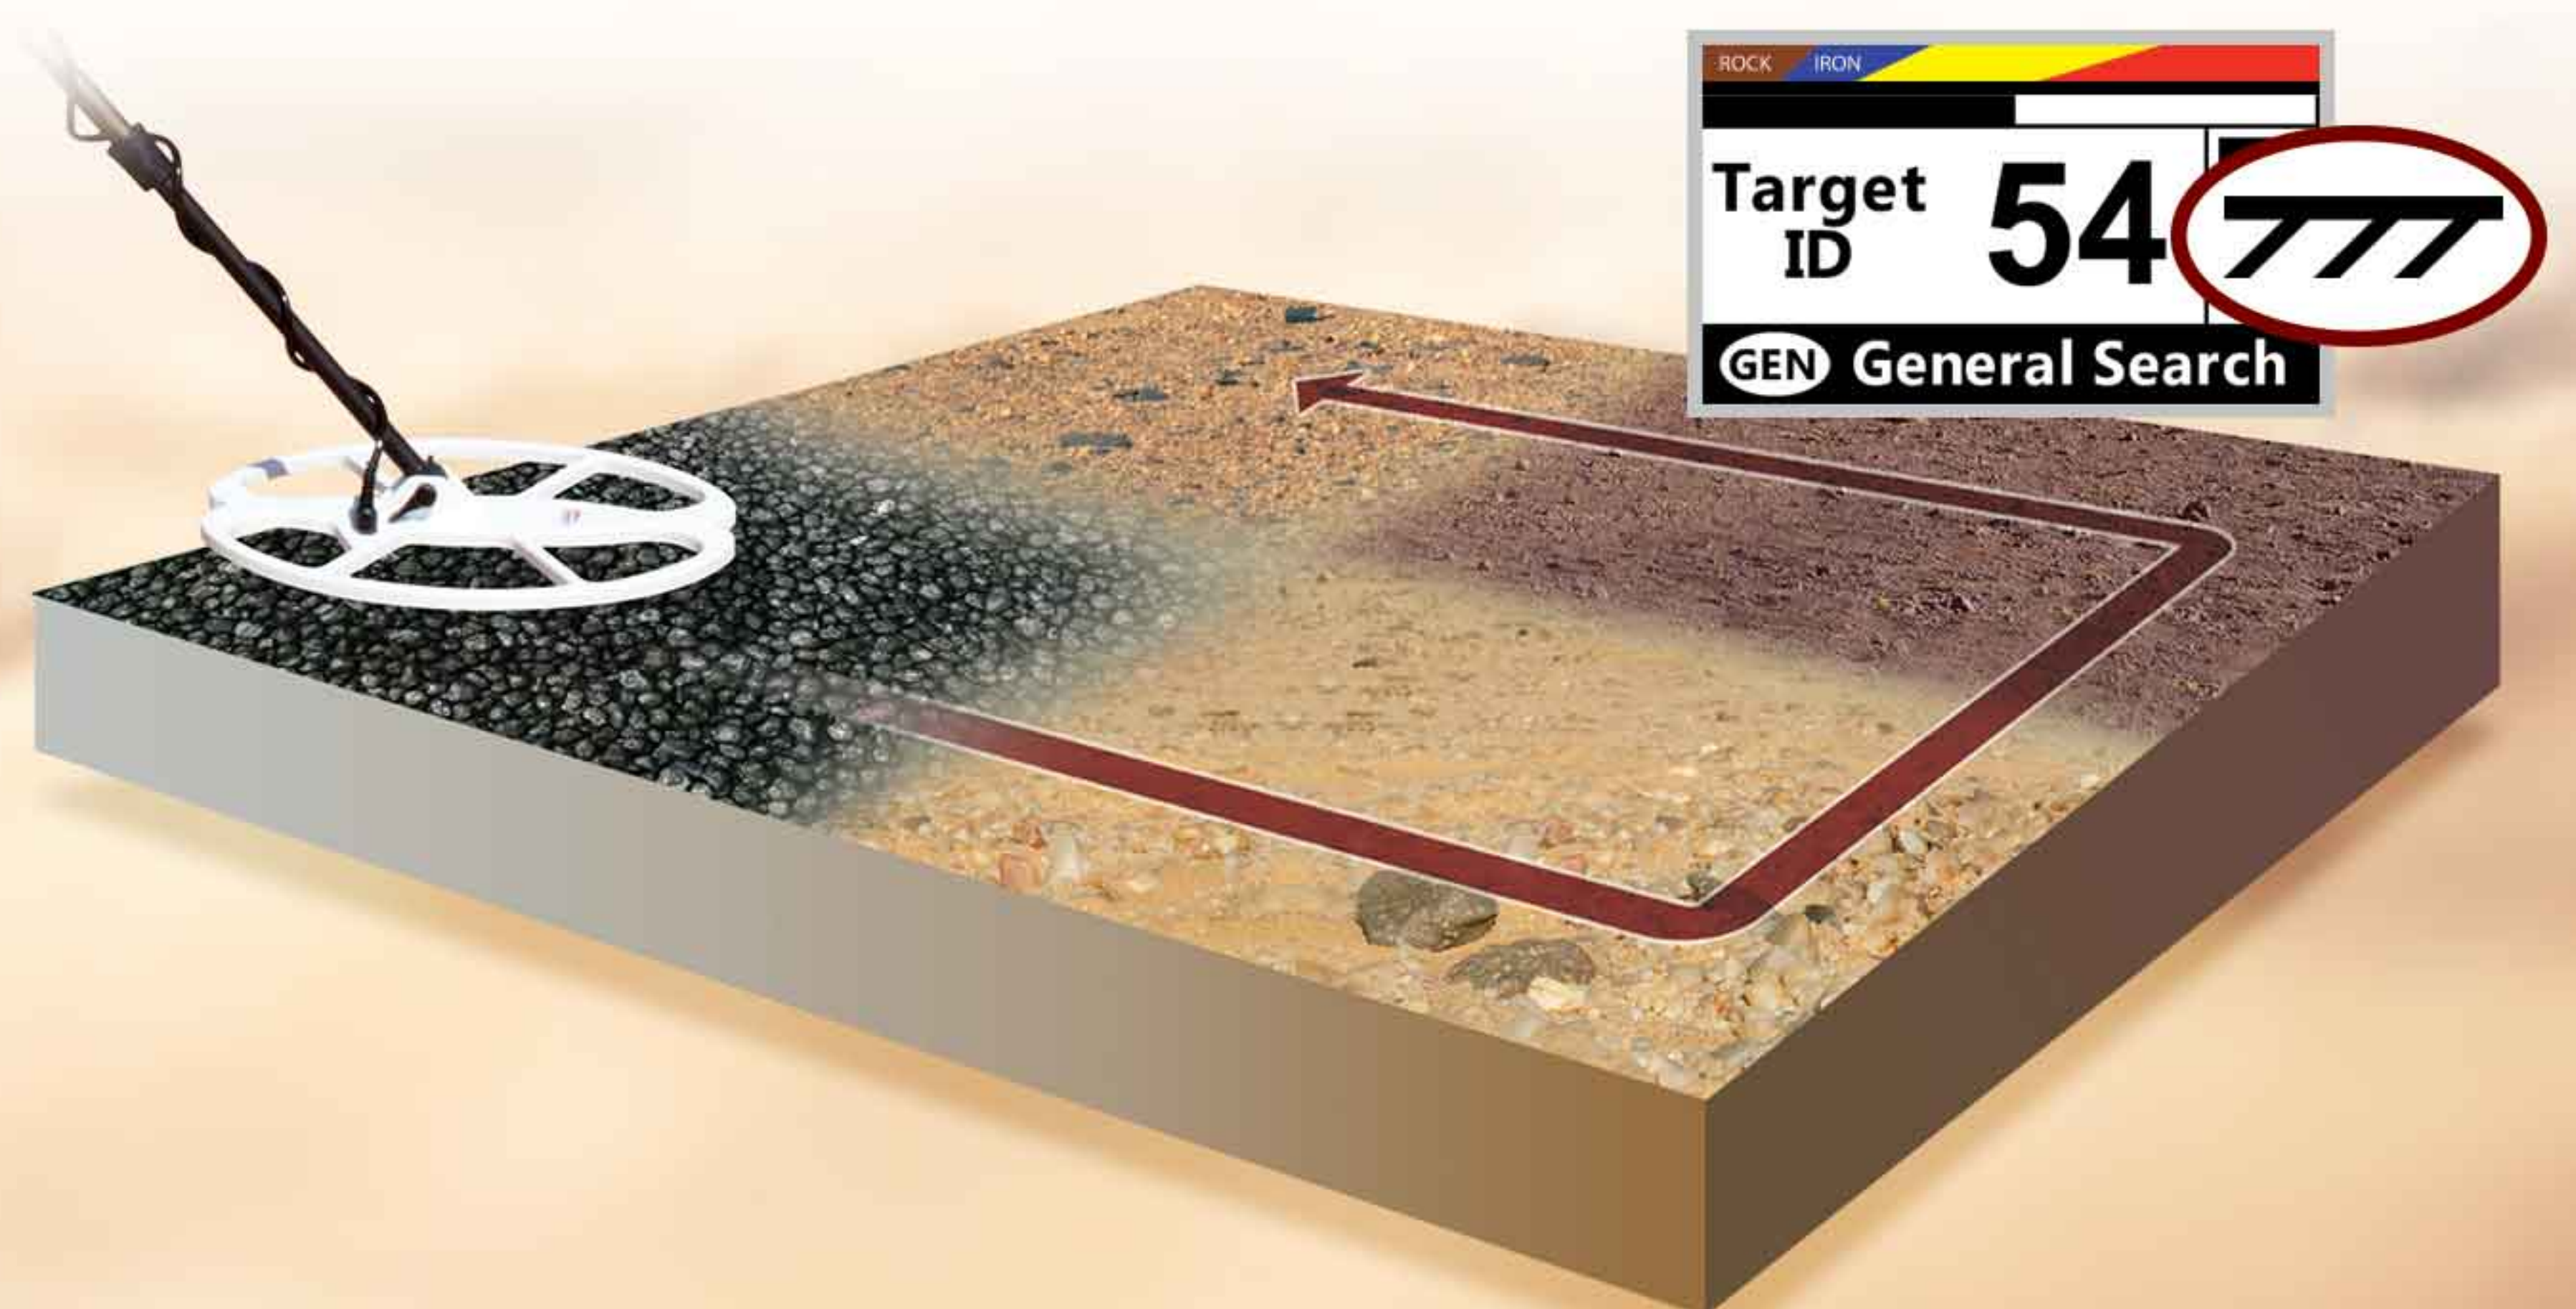

This is the 3-tone discrimination mode. This mode is ideal to use in fields with different types of metals enabling you to search faster with audio discrimination.

Boost (BST)

It is the 2-tone discrimination mode. Developed for use in gold fields, this mode is deeper than DI3. It provides more depth for nugget searching and minimizes the effects of hot rocks.

Ground Tracking

- Along with automatic and manual ground balancing, **FORS Gold** also offers ground tracking which tracks the changes in ground and automatically adjusts the ground balance to suit. The visible or invisible changes in ground affects the detection depth as well as the discrimination ability of the device so you can improve the performance of the device by activating this feature on suitable ground.

Thanks to its waterproof search coils and advanced settings, it impresses with its **high performance** even in the toughest terrains.

Digital Target ID and ID Masking

- When **FORS Gold** detects a target, it displays the target ID on the screen and gives you an idea about what the target may be. ID Masking, on the other hand, enables you to search by ignoring unwanted targets. It provides ease of use by rejecting hot rocks and metals such as iron and foil.

Dual LCD Display and Graphical User Interface

- **FORS Gold** has 2 LCD displays - one on the system box and one on the handle. Dual LCD display and graphical user interface let you easily adjust the settings and see all the information you need on the screens. Once you adjust your settings on the LCD panel located on the system box, you can follow most of the information on the display in the front. This way you don't need to go back and check the LCD panel constantly. This provides great comfort during searching.

Electronic Pinpointing and Depth Indicator

- With **FORS Gold**, you can easily pinpoint a target with just the push of a button. As the target is approached in the pinpoint mode, the signal tone will get stronger and change in pitch and at the same time, the depth reading will appear on both screens. Pinpoint feature will save you digging time and enable you to reach your target faster.

It is unrivaled with its
advanced technology, speed and
unique design.

Vibration Mode

- Designed with the hearing impaired in mind, **FORS Gold** achieved a first with the vibration feature.
Vibration feature is also ideal for users who do not want to use headphones in outdoor noise such as wind or waves.

Built-in LED Flashlight

- **FORS Gold** built-in flashlight offers great convenience by illuminating the scan area when searching at night or in dark. You will not need an external illumination device.

Easy Use and Ergonomic Design

- **FORS Gold** is impressing not only with its electronics and software, but with its ease of use and ergonomic design as well. With its easy access settings, its widest scan design and its ergonomics which will not exhaust you during prolonged searches, **FORS Gold** is an indispensable detector for all detectorists.

Long Battery Life

- **FORS Gold** works with 4 AA Alkaline batteries that can easily be purchased anywhere and provides approximately 25-30 hours of use. You can also purchase the optional rechargeable batteries and the charger and charge your batteries at home or in your car.

10 Languages

- **FORS Gold** is an international detector offering worldwide use with its 10 language options. Once you select the language in the menu, the device will start in the language you have selected after you turn off and on the device.

It is effortless with its **ergonomics,**
durability and **easy use.**

Once you try it,
you will never go back...

PACKAGE CONTENTS

Standard Package

28.5 x 17.8 cm (11.2"x 7.0")
DD Search Coil

Headphones

4 AA Alkaline Batteries

Pro Package

13.2 x 12.0 cm (5.2"x 4.7")
DD Search Coil

28.5 x 17.8 cm (11.2"x 7.0")
DD Search Coil

39.5 x 33.7 cm (15.5"x 13.3")
DD Search Coil

Carrying Bag

Headphones

4 AA Rechargeable Batteries

AC/Car Charger

Treasure Pouch

Weather-Resistant Cover

Embroidered Cap

Technical Specifications

Operating Principle	: VLF Induction Balance
Operating Frequency	: 15 Khz (+/- 100 Hz bandwidth)
Metal Identification	: Motion, multi-derivative
Search Modes	: 3 (General/Discrimination/Boost)
Audio Frequencies	: 5
Audio Discrimination	: 3 tones
Ground Balance	: Auto and Manual
Ground Tracking	: Yes
Pinpoint	: Yes
Frequency Shift	: Yes
Vibration	: Yes
Sensitivity Range	: 1-99
Target ID Range	: 0-99
Search Coil	: 28.5x17.8 cm (11.2"x 7.0") waterproof DD
Weight	: 1.8 kg (3.9 lbs.) including batteries and search coil
Length	: 125-150 cm (4'2"-5') extendable
Battery	: 4 AA Alkaline
Warranty	: 2 years
